Kuehne+Nagel Group

Kuehne+Nagel introduces a server and data centre logistics solution for the cloud infrastructure sector

- **Addressing the growing demands and geographic expansion of the cloud infrastructure industry**
- **The end-to-end logistics solution offers access to Kuehne+Nagel's global air logistics network and road transport solutions**

Schindellegi / CH November 19, 2024 – Drawing on its experience of delivering logistics solutions for server and data centre customers, Kuehne+Nagel announces the global launch of a specialised logistics solution for the growing cloud infrastructure industry. The strong growth of this sector has further accelerated with the expansion of artificial intelligence (AI). Gartner forecasts that spending on public cloud services will grow by 20.4% in 2024 and by 22.1% in 2025 due to AI growth.

"Customers of cloud infrastructure demand reliable, secure, and scalable solutions that cater to the specific needs of their industry and enhance the resilience of their supply chains. The introduction of this dedicated solution underscores our commitment to supporting the global expansion of customers in this rapidly growing sector," states Yngve Ruud, Member of the Management Board of Kuehne+Nagel International AG, responsible for Air Logistics.

The comprehensive solution addresses the specific needs of an industry that demands reliability, predictability, security, and visibility throughout the entire supply chain. It offers access to Kuehne+Nagel's extensive global air logistics network with continuous pickup and delivery services, including last-mile white glove road transport solutions. A worldwide network of certified logistics experts is trained to deliver sensitive and oversized servers to data centres with consistent quality and security.

The solution offers real-time visibility of essential shipment information, enabling customers to make quick and informed decisions. Digital tools reduce risks and identify optimal shipping routes suited to operational needs. GPS capabilities track and monitor shipment movements in real time, offering detailed data reports to verify temperature, light exposure, and chain of custody at all touchpoints.

Kuehne+Nagel further offers a breadth of sustainable transport solutions to complement the service, which reduces shipment emissions and contributes to reaching environmental targets.

About Kuehne+Nagel

With over 80,000 employees at almost 1,300 sites in close to 100 countries, the Kuehne+Nagel Group is one of the world's leading logistics providers. Headquartered in Switzerland, Kuehne+Nagel is listed in the Swiss blue-chip stock market index, the SMI. The Group is the global number one in air and sea logistics and has strong market positions in road and contract logistics.

Kuehne+Nagel is the logistics partner of choice for 400,000 customers worldwide. Using its global network, logistics expertise and data-based insights, the Group provides end-to-end supply chain solutions for global companies and industries. As a member of the Science Based Target Initiative (SBTi), Kuehne+Nagel is committed to sustainable logistics by reducing its own environmental footprint and by supporting its customers with low-carbon logistics solutions.
